

HOW VERTICAL EXPENSE HELPS YOU REDUCE YOUR INDIRECT CO2 EMISSIONS?

The “carbon footprint” component of our solution has been designed and designed to meet the commitments & requirements of large companies in terms of reducing their carbon footprint.

It responds in particular to the need to apply a proven calculation method and to control GHGs on employee travel.

Intermodality

Calculation of GHGs by type of business trip

- 1** **Proposal of alternatives if short distance journey**
Display of carbon rate by mission orders & travel expenses

Visibility

Real-time monitoring of carbon indicators

- 2** **Recovery of volume of GHGs emitted throughout the park**
Dashboards of CO2 emissions emitted by employee, by mission, by entity, etc.

Compliance

Export of carbon data for extra-financial reporting

- 3** **Consolidation of CO2 data**
Export of the file in the desired format for extra-financial compliance reporting

Benefits

- Accurate assessment
- Control & Compliance
- Help with the decision
- Employee satisfaction
